About

mypaystation is the brand and innovative service developed by MyPay Sdn Bhd (MyPay) to deliver electronic payment and collection services to the Malaysian market.

MyPay is a fast-growing Fin-Tech company, and is becoming the leading processor and distributor of electronic payments and collections in Malaysia for telco reloads, bill payments and e-money services. We bring merchants and biller partners together to offer a range of products and services for the benefit and convenience of discerning consumers where security, accuracy and efficiency are important criteria to the customers.

Our products and services are offered on the **mypaystation** self-care portal website, through the smartphone application and at our point-of-sales outlets across Malaysia.

mypaystation makes it more convenient for you to receive payments from your customers, anytime and anywhere.

With **mypaystation**, you can pay bills, do reloads and other transactions through multiple access points such as at our website, smartphone application or at our walk-in locations

Services

We help you get the right products and services to the right customers.

As a **mypaystation** agent, you can provide the following services to your customers.

- Pay utility bills - water, electricity, broadband and other bills
- Pay postpaid mobile phone bills
- Reload prepaid accounts
- Reload prepaid mobile accounts in another country
- Reload online game points
- Settle assessment bills and/or fines with local municipal councils

Advantage

- Innovative products and services to increase your customer base and revenue.
- No investment in inventory or acquisition of equipment.
- Dedicated customer service support to assist you with questions and concerns on your account.
- Internationally accredited banking-level and telco-grade security for handling our e-wallet system.

And as we grow and extend our network, you too will be able to expand your business with us.

The **mypaystation** smartphone app provides a quick and easy payment experience that you can deliver to your customers.

Key Features

- Available on Android platform. IOS support is on the way!
- Responsive design for optimal user experience
- No investment required for any ICT infrastructure
- Quick and easy registration
